

We Want a Healthy Forest

Create jobs

Healthy Water Sheds

~~Get rid of debris~~

Utilize Material as soon as possible so it doesn't Rot & go to waste

Have a Bench Mark so all contractors have to do quality work.

Jerry Cardwell

DEC funds - what's is the balance (Tcd)
between FS and State

- FS doesn't manage animals, we manage habitat for success
- State manages population

- VCP - have we talked or
worked w/ them. They run the
large herd on the sprng,
they come to VCP and eat forage
or allotments

(Chns L)

- fencing is an issue, but VCP puts in or removes.
- Refined incident 2 years ago
w/ 300+ head of cattle

More logging to clear up
the forest, to help with fire
more jobs for the community.

grazing for animal, too much
forest canopy that doesn't allow
sun to reach forest floor, for
healthy understory trees are too
densely & make ~~trees~~ un healthy

adult need simple terms
will come from

We need more logging?

We opportunity to get out
Material before burning for
Fuelwoods. We can clean up
area before burning. We can
help out with slash ~~with~~ piling.
in adov Danic

from Eddy

for how it goes -
also Dabbs -

THANKS - VERY HELPFUL AT
DISTILLING RUMORS, ADDING GOOD
INFORMATION.. VERY REASSURING

mcises - Concerned about the Rx
burning and usual quality. also
killing remaining trees after thinning
through burning

i.e., look at Cebolla i.e. Canyon

Doesn't want to see that in
Carson wls.

& losing latillas and other
weed products through Rx

More development
of recreation to gain
more resources through tourism
& economic advantages for the
Community

- ① - Why are some areas being mt (Mr. Smith)
treated prior to Rx and some
are just Rx.
- 5-10 miles temp roads.
- Have they been determined where
located.
Not yet.
- Goats peaked Mr. Smith's interest
- helping maintain ~~either~~^{as another} than
tool beyond burns.

- ② - Goats help w/ gambel oak maintenance
- Goats are browsers, they go for
num locust, oak, etc - all that
comes back after Rx
